Retail Solutions.

Your staff are not the only ones concerned about COVIT-19 your customers are, too. In these uncertain times, it can be hard to know how to ease the fears of your customers and staff. Many retailers already have plans in place, but we wanted to show you some of the latest technology available that may help.

Having visual safety measures in place that your customers and staff can clearly see, helps reduce the fears as it shows you are taking their safety seriously.

Retail
Solutions.

During a global health pandemic, information can change without warning and one solution does not necessarily fit all. Store leaders may have to make tough calls about what to prioritise, or how to execute direction from Headquarters in a way that fits with their location.

Each government is carving its own pathway to "a new normal," complete with social distancing restrictions, health-safety protocol and changed customer behaviours.

Evolves Globo partners are tracking the changes around the world and looking for new, innovative products and solutions to help improve customer and staff safety whilst trying to maintain the customer experience.

Disclaimer

Face temperature devises are not intended to diagnose or monitor any medical condition or illness. These products are supplied as a first-line defence for organisations that wish to identify and check people entering their buildings. It is down to the organisation to determine how that information is used, and the appropriate reaction to take.

Screening Solutions.

The Evolve 360 Thermal Imaging camera is a highly accurate, portal handheld temperature measuring instrument which can help in the fight against COVID-19.

With long read range this device is ideal for fast checking of customers and staff as the enter a store.

When mounted on the tripod stand close to the store entrance it can quickly check customers temperature before they wonder around your store.

It also acts as a visual safety measure installing confidents in your customers that you are taking theirs and your staffs health seriously.

(Tripod doesn't include)

Screening Solutions.

The EvolveBody is an intelligent Wi-Fi smart thermal imaging camera for body temperature screening with built-in alarm.

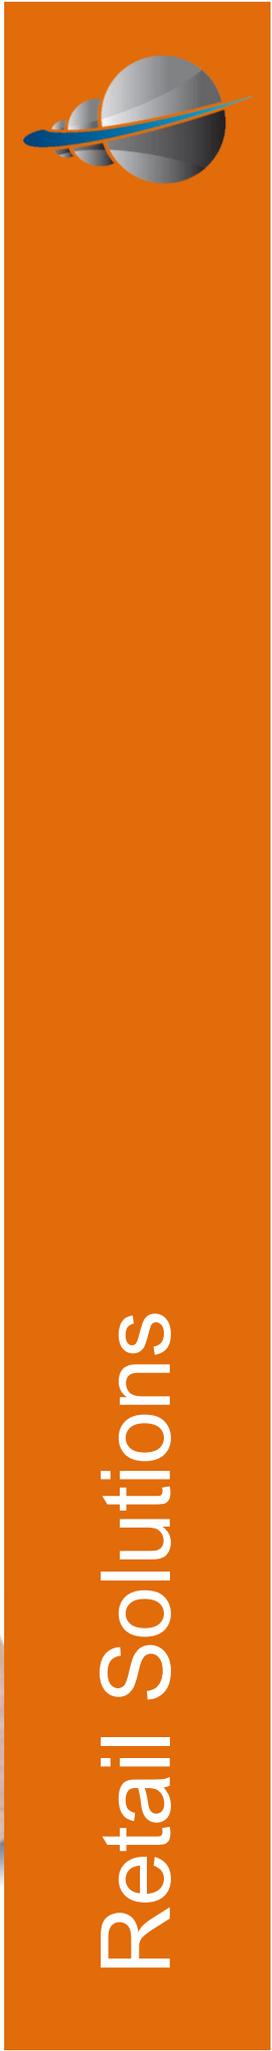

The EvolveIP thermal bullet camera is perfect for all types of premises to capture the face and temperature of a crowd of people.

This camera is great to check high volumes of customers and staff quickly and securely ideal for site entrances and exits.

It can be either wall mounted or mounted on a tripod stand to offer a portable solution.

Screening Solutions.

If used as access control before allowing entry, the forehead temperature sensor will check the persons temperature and decide whether to allow entry or not.

The EvolveFace 5T is ideal for smaller retail outlets where it can sit on a counter or be wall mounted and used as a simple temperature checking device for staff and customers.

It can also be used as an employee face recognition terminal with simple time and attendance.

In addition it can be used to control access points into a secure area, providing a secure, TouchLess and cost-effective way of controlling who has access to your store and when their access is allowed.

The AndroitFace 7T is a face recognition terminal with temperature detection designed to work with entrance control turnstile and gates for distribution centres and head offices.

It can be easily interfaced with most makes of visitor and staff management systems via the Wiegand interface such as the Paxton Net2 controller.

The terminal can work as a stand-alone unit to control a simple door, pedestrian turnstile, or gates; they can also be networked.

Access Control Solutions

The EvolveFace 5 is ideal for smaller retail outlets where it can sit on a counter or be wall mounted and be used as an employee face recognition terminal with simple time and attendance.

In addition, it can be used to access points into a secure areas.

Providing a secure, TouchLess and cost-effective way of controlling who has access to your building and when their access is allowed.

The LinuxFace 7 offers a secure, TouchLess and cost-effective way of controlling who has access to your building and when their access is allowed.

Installing an access control system with face recognition means that you will never have to replace lost or stolen tokens and a face can easily be barred from the system.

Our face tablets can be mounted to a standard door or any make of pedestrian or vehicle entrance control turnstile, gate, or barrier.
